

Organic

GC BioPot

Fast-acting liquid potassium to optimise quality and flavour of fruits

GC BioPot is an organic liquid potassium for improving taste and flavour of high quality fruits, roots and vegetables.

Key Product Attributes

Clear liquid fertiliser high in potassium for foliar or drip irrigation application.

Contains natural polyols to provide surfactant and spreading properties.

Formulated with Tricarboxylic Acids to increase cation exchange capacity and improve nutrient uptake.

Contains very low levels of chloride.

Analysis

Potassium Oxide soluble in water (K ₂ O)	23 % w/w	30 % w/v
---	----------	----------

Main Use

Provides potassium effectively to crops to help obtain high quality yields and maximise taste and sugars in fruits and vegetables.

Application Rates

Crop	Rate for soil application
Tomatoes, Peppers, Cucumbers, Lettuce	10 - 15 L/Ha/week from early fruit development to harvest
Strawberry, Raspberry, Blackberry, Redcurrant	8 - 10 L/Ha/week from early vegetative growth to harvest
Blueberry	5 - 8 L/Ha/week from early vegetative stage to early fruit development
Fruit trees, olives, avocados and citrus	10 - 15 L/Ha/week from early vegetative growth to early fruit development

Foliar application: 1-3 applications throughout the growing season, from fruits or roots development to harvest. In all crops in general 400-600 mm / 100 litres of water = 4-6 L / Ha and application.
