

GC Micro ZMan

Provides energy to crops, prevents and corrects zinc and manganese deficiency symptoms

GC Micro ZMan is a liquid technology to prevent and correct zinc and manganese deficiency symptoms while stimulating the crop with free L-Amino Acids.

Key Product Attributes

Supports the vegetative and reproductive stages with a package of Free L-Amino Acids.

Formulated with natural polyol biopolymers for rapid absorption and translocation of nutrients.

No wetting adjuvants are needed for its foliar application.

Analysis (w/w)

Free Amino Acids	8% w/w	9.6% w/v
Total Nitrogen (N)	2% w/w	2.4% w/v
Organic Nitrogen (N)	2% w/w	2.4% w/v
Manganese soluble in water (Mn)	4% w/w	4.8% w/w
Zinc soluble in water (Zn)	4% w/w	4.8% w/w
pH	4	

Aminogram: Ala, Arg, Asp, Cys, Gly, Glu, Hyp, His, Iso, Leu, Lys, Met, Phe, Pro, Ser, Tyr, Thr, Val

Main Use

GC Micro ZMan effectively prevents & corrects zinc and manganese deficiency symptoms in crops.

Helps to overcome situations of hydric, nutritional and climatic stress.

Application Rates

Foliar Application: For all types of crops, woody and herbaceous, an application is recommended between 300 to 400 cc / 100 litres of water = 3 to 4 L / Ha. The number of repetitions will depend on the degree of deficiencies of manganese and zinc.

Drip irrigation: Applications can be made at 3 to 6 L/ha, depending on the type of deficiency and the level of requirement of the crop.
