# GC BioFrass

The most sustainable fertiliser and biostimulant for your crops

**GC BioFrass is a natural and organic soil amendment derived from by-products of the Black Soldier Fly (BSF) breeding industry. Contains high levels of the natural biostimulant chitin and slow-release organic NPK and carbon.**

## Key Product Attributes

Organic-certified, slow-release NPK with high levels of chitin, a natural substance that promotes root growth and activates the plant's natural defence systems against insect pests and fungal diseases.

Formulated as pellet, crumbs (broken pellets) or natural for easy application to soils with standard fertiliser spreaders.

Produced to the highest standard, including thermal treatment for safe use in agriculture.

## Analysis (w/w)

Total Nitrogen (N)	3%
Total Phosphorous Pentoxide (P <sub>2</sub> O <sub>5</sub> )	3%
Total Potassium Oxide (K <sub>2</sub> O)	2%
Dry matter	90%

## Main Use

GC BioFrass adds high-quality organic matter (proteins, carbohydrates, amino acids) to soils

Enhances natural crop protection derived from the presence of chitin.

Increases nutrient uptake, biological activity of soils and crop health.

Improves soil structure, water holding capacity and the release of nutrients.

## Application Rates

Apply to soils at 300 kg/ha to 1000 kg/ha, depending on crop size. Incorporate the product into the soil for best results. Applications can be made every 2 months from early spring to mid-summer.
