GC BioVitality

Restoring the vitality and fertility of soils and crops

GC BioVitality is an organic activator containing humic and fulvic substances with amino acids.

Key Product Attributes

Organic-certified technology designed to revitalise and create an ideal environment in the soil for the establishment of seeds, seedlings and the seasonal growth of established crops.

High content of amino acids and peptides of small molecular weight for easy assimilation by beneficial soil microbes.

Formulated as a pellet for easy application to soils with standard fertiliser spreaders or even manually.

Produced to the highest standard, including controlled aerobic composting treatment for safe use in agriculture.

Analysis (w/w)

Free Amino Acids	6.1%
Total Nitrogen (N)	0.8%
Total Organic Nitrogen (N)	0.5%
pH	7
Aminogram: Ala, Arg, Asp, Glu, Gly, Hip, His, Ile, Leu, Lys, Met, Phe, Pro, Ser, Tyr, Thr, Trp, Val	

Main Use

Ideal soil amendment to incorporate bioactive organic carbon in new plantations.

Improves natural soil fertility and the release and uptake of nutrients in established crops.

Application Rates

Apply to the soil at 300 to 1500 kg/ha, depending on crop needs. New plantations: 300 to 500 g/tree. Distribute the product throughout the surface to be cultivated. It can also be placed in bands between the rows of the crop or irrigation points, according to the characteristics of the crop. Incorporate into the soil for best results.
