

GC Flow Plus Range

Advanced water-soluble fertiliser and biostimulant with protected micro elements and powered by SSN Technology

GC Flow Plus is a unique range of water-soluble NPK fertiliser designed with Soluble Sustainable Nutrient (SSN) Technology, which boosts the uptake and assimilation of nutrients by inducing Plant Growth-Promoting Rhizobacteria (PGPR). Contains amino acids to help crops withstand stress situations.

GC Flow Plus Max N	20.5-0-0	+ TE + TCA + AMINO ACIDS
GC Flow Plus High N	18-5-5	+ TE + TCA + AMINO ACIDS
GC Flow Plus High P	12-40-6	+ TE + TCA + AMINO ACIDS
GC Flow Plus High K	12-5-40	+ TE + TCA + AMINO ACIDS
GC Flow Plus Balanced	12-15-15	+ TE + TCA + AMINO ACIDS
GC Flow Plus Ca	14.5-0-9 + 20 CaO	+ TE + TCA + AMINO ACIDS

Powered by SSN Technology

Key Product Attributes

Highly soluble and slightly acidic fertiliser with pH & EC control technology to increase nutrient availability and create the ideal nutrient solution.

Unique SSN (Soluble Sustainable Nutrient) technology designed to effectively deliver more nutrients to plants by stimulating Plant Growth-Promoting Rhizobacteria (PGPR), which are responsible for nutrient solubility and availability.

SSN Technology improves the Nutrient Use Efficiency of Nitrogen, which allows for reductions in the nitrogen input of fertiliser programmes without reducing yield or quality of the produce.

Powered by a unique package of free amino acids to increase the crop's capacity to endure stress and tricarboxylic acids to protect and improve the uptake of phosphorus.

Micro elements are complexed with lignosulphonate to keep them available in the rootzone and naturally stimulate the plant and soil biology.

SSN Technology represents a real science-based answer to the problem of low Nitrogen Use Efficiency (NUE) in agriculture.

Main Use

Ideal fertilisers designed to support every crop stage during the growing season for high-quality yield crops.

Used by professional growers to maximise nutrient utilisation, crop performance and provide plants with enhanced stress tolerance thanks to the inclusion of free amino acids.

Help crops prepare for and recover from stress situations while maximising the natural functioning of beneficial soil microorganisms.

GC Flow Plus range is an innovative answer to achieve sustainable crop production systems where more yield is produced with less units of nutrients.

Application Rates

Application rates will largely depend on the crop and expected yield, type of soil/substrate and soil analysis, amongst other factors. Consult your Green Connection technical representative to discuss the best fertilisation programme based on your objectives.
