

GC Flow - SB Mix

Water-soluble fertiliser for professional soft fruit growers

GC Flow - SB Mix is the result of years of experience of British soft fruit growers, combined with intensive agronomical research. Designed to be used with other straight fertilisers to create the ideal fertiliser programme for strawberries, raspberries, blackberries and redcurrant.

Key Product Attributes

Provides all the phosphorous, magnesium and trace elements, and most of the potassium, required by berry crops.

Straight fertilisers can be added to create a customised fertiliser recipe for professional soft fruit production.

Contains tricarboxylic acids, the same organic acids naturally produced by roots to increase nutrient uptake.

Contains seaweed extract to provide a constant biostimulant effect for better crop performance under stress.

Main Use

Soft fruit production in soils and containers for use during the whole growing season.

GC Flow - SB Mix is ideal for creating a fertiliser programme for strawberry, raspberry, blackberry and redcurrant cultivation in soils with low organic matter content or containers.

Application Rates

GC Flow - BB Mix is dissolved at 7 - 8kg/100 litres of water to produce 10,000 - 20,000 litres of fertiliser solution. To be used in combination with straight fertilisers.

Contact your local Green Connection representative to help you prepare your ideal feed recipe.

Analysis (w/w)

Total Water Soluble Nitrogen (N)	5.0%
Nitrate N	5.0%
Total Phosphorous Pentoxide soluble in water (P_2O_5)	15%
Total Potassium Oxide soluble in water (K_2O)	30%
Total Magnesium Oxide (MgO)	6.0%
Total Sulphur Trioxide soluble in Water (SO_3)	12.9%
Iron chelated by LSEDTA (Fe)	0.1%
Manganese chelated by LSEDTA (Mn)	0.075%
Boron (B)	0.03%
Zinc chelated by LSEDTA (Zn)	0.1%
Copper chelated by LSEDTA (Cu)	0.03%
Molybdenum (Mo)	0.005%
Contains organic acids and seaweed
